

MAJJI PRASAD

Junior Product Engineer | Python Developer

+91 9949490504 — majjiprasad9949@gmail.com — LinkedIn — GitHub

PROFESSIONAL SUMMARY

Computer Science graduate with strong skills in Python, SQL, MySQL, PostgreSQL, and REST APIs. Experienced in backend application development, API integration, database management, and data processing. Strong understanding of SDLC, Agile methodologies, and problem-solving with hands-on experience developing scalable software solutions.

EDUCATION

Malla Reddy Engineering College and Management Sciences 2021–2025
Bachelor of Technology (Computer Science and Engineering) CGPA: 7.87/10

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java
Databases: MySQL, PostgreSQL, Oracle SQL, Relational Databases
Backend Development: REST APIs, CRUD Operations, API Integration, Data Processing
Concepts: OOP, SDLC, Data Structures, Debugging
Tools: Git, GitHub, VS Code, Jupyter Notebook, Excel, Data Validation

EXPERIENCE

Web Development Intern – TECHNOHACKS SOLUTIONS May 2024 – Jun 2024

- Built responsive and cross-browser compatible web interfaces using HTML5, CSS3, JavaScript, and React.js.
- Integrated REST APIs with frontend components for dynamic data handling and real-time interaction.
- Worked using Git/GitHub collaborative workflows with feature branching and clean coding practices.
- Followed SDLC methodologies and contributed to Agile development environments.

PROJECTS

Employee Management System using Python

- Developed a Python-based employee management application for handling employee records and operational workflows.
- Implemented REST APIs and SQL-based CRUD operations for employee creation, updates, retrieval, and deletion.
- Designed relational database structures and optimized SQL queries for efficient data management.
- Performed testing and debugging to improve application reliability and performance.
- Technologies: Python, SQL, MySQL, REST APIs

Sales Pipeline Analytics System

- Built a Python and SQL-based analytics system to process and analyze sales pipeline data.
- Performed data extraction, transformation, and validation to improve reporting accuracy.
- Optimized SQL queries to improve processing performance for business metrics.
- Automated reporting workflows and KPI tracking for business insights.
- Technologies: Python, SQL, MySQL, Power BI

CERTIFICATIONS

- Databases for Developers – Oracle
- Python Programming – NPTEL
- Power BI for Data Visualization
- Data Analytics Fundamentals
