

MAJJI PRASAD

AI Engineer | Full Stack Developer

+91 9949490504 | majjiprasad9949@gmail.com | LinkedIn | GitHub

Professional Summary

AI Engineer with proven expertise in building machine learning systems and scalable full-stack applications. Developed classification models achieving 89% accuracy for infrastructure damage assessment and designed blockchain-based credential systems reducing verification time by 30%. Strong foundation in Python, React.js, Node.js, Django, AI/ML workflows, and REST API development. Passionate about developing AI-driven and agentic solutions for real-world applications.

Technical Skills

- Programming:** Python, JavaScript, SQL, Java
- AI / ML:** Scikit-learn, TensorFlow, OpenCV, Pandas, NumPy, Machine Learning, Deep Learning, SVM, Random Forest, Feature Engineering, SMOTE, Prompt Engineering, LLMs
- Web Technologies:** React.js, Node.js, Django, REST APIs, HTML5, CSS3
- Databases:** MySQL, MongoDB, Oracle SQL
- Tools & Platforms:** Git, GitHub, Jupyter Notebook, VS Code, AWS, Ethereum

Experience

Web Development Intern

May 2024 – June 2024

TECHOCTANET PVT LTD

- Built responsive and cross-browser compatible web interfaces using HTML5, CSS3, JavaScript, and React.js.
- Integrated REST APIs with frontend components for dynamic data handling and real-time interaction.
- Worked using Git/GitHub collaborative workflows with feature branching and clean coding practices.
- Followed SDLC methodologies and contributed to agile development environments.

Projects

ML Classification of Structural Damage

Python, OpenCV, Scikit-learn

- Developed an image classification system achieving approximately 89% accuracy for structural damage detection.
- Performed preprocessing, feature extraction, and class balancing using SMOTE techniques.
- Implemented SVM and Random Forest algorithms with model evaluation and hyperparameter tuning.
- Visualized model performance using confusion matrices and accuracy metrics.

Blockchain-Based Credential Verification Platform

Django, REST APIs, Ethereum

- Developed a decentralized credential verification platform reducing manual verification time by 30%.
- Implemented role-based access control for multi-user system functionality.
- Used SHA-256 hashing mechanisms for secure and tamper-proof data validation.
- Optimized backend workflows and database interactions for improved efficiency.

Education

Bachelor of Technology in Computer Science and Engineering

2021 – 2025

Malla Reddy Engineering College and Management Sciences

CGPA: 7.87 / 10

Certifications

- Machine Learning with Python – IBM
- Web Development – NASSCOM Foundation
- Databases for Developers – Oracle
- AWS Technical Essentials
