

MAJJI PRASAD

Software Engineer | Full Stack Developer

+91 9949490504 | majjiprasad9949@gmail.com | LinkedIn | GitHub

Professional Summary

Computer Science graduate with strong foundations in Java, Python, Data Structures, Algorithms, Object-Oriented Programming, and Software Development Life Cycle (SDLC). Hands-on experience through projects and internships in application development, REST APIs, databases, and collaborative workflows. Quick learner with strong problem-solving, communication, and teamwork skills, eager to contribute and grow in a dynamic environment.

Education

Malla Reddy Engineering College and Management Sciences

Bachelor of Technology in Computer Science and Engineering

Nov 2021 – Jun 2025

CGPA: 7.87/10

Technical Skills

Programming Languages: Java, Python, JavaScript

Web Technologies: HTML5, CSS3, React.js

Backend: Django, REST APIs, Spring Boot, JDBC

Databases: MySQL, Oracle SQL, SQL

Core Subjects: Data Structures, Algorithms, OOP, DBMS, Operating Systems, SDLC

Tools: Git, GitHub, Maven, Postman, VS Code

Internship Experience

Web Development Intern — TECHOCTANET Pvt Ltd

May 2024 – Jun 2024

- Developed responsive and reusable web interfaces using HTML, CSS, and JavaScript.
- Integrated frontend modules with REST APIs for dynamic functionality and real-time interaction.
- Collaborated using Git and structured development workflows.
- Improved code maintainability by following clean coding standards and reusable component design.
- Worked within Agile methodologies and SDLC practices.

Projects

Banking Transaction Management System

- Developed a backend banking application using Java, Spring Boot, JDBC, and MySQL for secure transaction management.
- Implemented transaction processing using ACID-compliant database operations and rollback mechanisms.
- Designed REST APIs and optimized database queries, reducing response time by 35%.
- Applied dependency injection and software design principles to improve scalability.
- Implemented batch processing concepts for financial reconciliation and transaction tracking.
- Technologies Used:** Java, Spring Boot, JDBC, REST APIs, MySQL, Docker, Maven, Git, Transaction Management, Batch Processing

Blockchain-Based Credential Verification System

- Developed a decentralized platform for secure academic credential verification using Python and Django.
- Implemented role-based access control and SHA-256 hashing for secure and tamper-proof data handling.
- Reduced manual verification effort by approximately 30%.
- Integrated REST APIs and database operations for scalable functionality.
- Technologies Used:** Python, Django, REST APIs, Blockchain, MySQL

Certifications

- Oracle – Databases for Developers
- Cisco – Java Programming
- IBM – Machine Learning with Python
- NASSCOM Foundation – Web Development
